

Purpose

The purpose of this procedure is to define the requirement for request, filing, retention and periodic checks for valid Waste Management Licences or Exemption certificate.

Scope

This procedure applies to all sites to which waste is transferred at J & E HALL International.

General

The Waste Duty of Care places a legal requirement on the company to ensure that waste generated by the company is only transferred to properly authorised or sites.

A Waste Management License maybe a site licence (authorising the deposit, recovery or disposal of controlled waste in or on land), or a mobile plant licence (authorising the recovery or disposal of controlled waste using certain types of mobile plant).

Some Waste Management Licences are valid only for certain kinds of waste or certain activities.

There are exemptions from licensing for certain activities and certain types of waste.

For example, recycling activities of various types of waste, such as paper, textiles and plastic.

Most exempt businesses need to register their exemption with the Environment Agency or the Scottish Environment Protection Agency.

It is possible to check with the Agencies that the exemption is registered.

All Waste Carrier Certification is retained for a minimum of three years.
