Item	Agenda Item Details	Actioned By	Date Actioned By
	>DEVELOP MONITORING AND MEASURING TECHNIQUES OF PROCESS AND PROCEDURES		
	AB confirmed the following actions:-		
	Developed Reporting system to Determine:-		
	•Accident Incident Rates		
	Lost Time Severity Rates Accident Frequency Rates		
	Defined Audit Schedule and Defect List Analysis Inspections by ZURICH (Crimson) Lifting Equipment		
	➤DEVELOP FIRE RISK ASSESSMENTS IN ACCORDANCE WITH (RRFSO)		
	MTC requires their Fire Risk Assessment to be updated. All other sites have been reviewed and are up to date.		
	>ALL SERVICE ENGINEERS TO HAVE A SKILL CARD		
	Following a recent review and subsequent data from service centre managers, it was confirmed that 80% of our engineers have the relevant Skill card. The short fall is due to operational restrictions and new employees joining the company. It is anticipated that all engineers will hold a Skill Card by the end of June 2009.		
	>ESTABLISH AND MAINTAIN AN EFFECTIVE SITE RISK ASSESSMENT SYSTEM	ı	
	ongoing training is conducted for all managers and their appointed person, where a site risk assessment is completed for all customer sites.		
4	Review of Policies AB issued copies of the new H&S policy dated 18th November 2008		
	Upon review, AB recommended that the policy was inline with current company objectives and direction and that no amendments were required at this stage. However the policy will be reviewed at the next meeting.		
5	Accident Review		
	AB confirmed the current accident procedure was on the HSQE web site and the accident process flow chart was available on the meeting presentation.		

Agenda Item Details	Actioned By	Date Actioned By
Accident Review (Cont)		
AB commented that the reporting of accidents from service centre location could be improved, as the HR and HSQE function in some instances were not informed.		
AB commented that the procedure was complex and requires clarification.		
AB invited Glen Mason, Alan Cowburn & Tracey Pulton to assist him in reviewing the procedure with the aim to have a holistic procedure between all group companies.		
meeting to be arranged.	АВ	Apr-09
Within the presentation AB identified the current documentation and the reporting procedure.		
AB communicated the Accident Incident rates for the business.		
AB commented on the spurious recorded value in 2006 and AB will confirm this with HR		
Within the presentation, accident statistics were reviewed and benchmarked against our industry body (BRA). AB commented of these statistics and compared them against ours.		
Following a review of the accidents by location, AB informed all attendees of the results. (attached in Presentation)		
Following the review AB proposed actions to be taken to reduce accidents		
# manual handling information, instruction & training # review of lifting aids # information, instruction & training on slips, trips & falls.		
AB confirmed that we now have a collection of training DVDs for general use.		
Induction Training COSHH Fire Manual Handling Noise Environment		
6 Near Miss		
AB outlined the importance of recording near miss events and with the supportive information went through the form and the reported near miss to date. AB confirmed that near following near miss events Safe working procedures and safety bulletins can be developed.		

7 Vehicle accidents Following the inclusion of vehicle accidents onto the accident review sheet, Vehicle accidents will be reviewed at all HSQE meetings. These statistics will be generated by a fleet management company J&E Hall accident information. 8 Internal Audit Review AB outlined the process approach to the company audit schedule and confirmed that H&S, Environment, Quality and Fire assessments are conducted. A report is generated and communicated throughout any opportunities for improvements are identified on relevant documentation and agreed action and dates are recorded. Internal audits conducted by AB were communicated and summarised 9 3rd party audits (BSI) A spread sheet identifying the agreed audit schedule from BSI was displayed the committee and the new format was outlined. External Audits (Customers) AB outlined the recent external audits completed by the HSQE function these have had positive feedback and in addition have added value to the relevant service centre. AB commented on the range of external audits available and invited any enquiries to conduct additional assessments or customer support. 10 Asbestos AB confirmed that the SWI for working with asbestos has been updated in accordance with HSG210. General discussions were conducted as to the potential risk to our engineers. AT made a good point on the likelihood of asbestos being present on board ships. AB & AT is to conduct a further assessment to gauge the exposure to our engineers. A tool box talk will be generated to issue to our engineers & AB will develop a company policy on working with asbestos. AB will issue a directive to all business functions which will highlight working with Asbestos containing Materials		Approde Horo Details	Antinonal Dec	Data Astionad Du

	Agenda Item Details	Actioned By	Date Actioned By
11	Web Site Update		
	AB updated all attendees on the HSQE website. The website has proved to be an effective tool as it makes sure the most up to date information is available for all employees at any time.		
	The site has evolved throughout the last six months and now includes McQuay Service and Coulstock & Place.		
	Some attendees requested the username & password for the site AB will forward to the HSQE committee.	АВ	Mar-09
12	F-Gas (2079 Qualification)		
	AB outlined the requirements of the new F-Gas regulations and specifically the new training requirements.		
	AB & PM have conducted meeting to ascertain the impact and the schedule of training for our engineers.		
	PM has generated a business objective which ensures adequate resources are available to ensure 30% of our engineers undertake 2079 training this year.		
	AB & PM will investigate further to ensure the most efficient and effective system is adopted to ensure this objective is achieved. It was confirmed that all refrigeration engineers must have the 2079 qualification before July 2011.	AB / PM	May-09
	AB outlined the company documentation in reference to the F-Gas Regulations and AB/ PM/ AC will review and implement throughout.	AB/PM/AC	May-09
13	Safety Representatives Reports		
	Cramlington - G Mason		
	All issues have been addressed within meeting		
	MTC - P Williams		
	No Comments		
	Midlands - D Houldsworth		
	Darren brought up the issue of asbestos and exposure to our engineers. General discussion were conducted and the general consensus was that this work is to be conducted by trainined and licensed personnel.		
	Apprentice driving - confirmation was required as to their authorisation. Currently this is being reviewed by CM/ PM/ AC/AB and will be communicated throughout when a policy has been agreed and developed.	AB/PM/CM/AC	Jun-09

Agenda Item Details	Actioned By	Date Actioned By
Safety Representatives Reports (cont)		
Plymouth - Alfie Traharne		
Alfie commented on bottle tracking and the previous system adopted. He expressed his concern about the current system		
AB will contact the Offshore business as they have adopted a weather proof system for the oil rig.		
AB will get a sample and the supplier and communicate throughout.	АВ	Apr-09
Alfie commented on the Technical Bulletins and their importance in identifying safety critical features.		
Botley - T Baugh		
information was requested on Care 50, he was advised to contact BOC.		
Trevor requested a company tree to be issued, where all centres know who is responsible for what within the company and their		
contact details. CM will review and communicate throughout	СМ	May-09
Westerham - G Argent		
Graham requested information and documentation for sub-contractors AB advised all on the approval process and that the procedure is available on the HSQE website.		
Derby - J Jackson (Reman)		
No issues		
Cardiff - A James		
Andrew requested an update on the electrical competence course. AB confirmed that the internal course was near completion and AB will be conducting the first electrical course at the end of April for McQuay Service. Any alterations or amendments will be implemented and used within the J&E Hall course.		
Andrew also requested information on Safe Ammonia handling for his engineers.		
Manchester - R Renner		
Robin required information on the current arrangement on engineers coveralls, AB will contact the purchasing function for additional information.	AB/ CF	Apr-09

Agenda Item Details	Actioned By	Date Actioned By
Safety Representatives Reports (cont)		
Manchester - R Renner (cont)		
Welding Certificates Robin commented that the welding certificates for certain engineers require updating. AB explained about the Welding requirement within the 2079 qualification and AB will confirm if this examination is transferable.	АВ	Apr-09
Lone Working AB outlined the arrangement and the updated SWI available on the HSQE website.		
Avonmouth - J O'Reilly		
No comments		
Glasgow - R Grieve		
No comments		
Peterborough - Ron Hall		
Ron required information on Qualifications for his Engineers and the respective service providers.		
Leeds - Shaun Green		
Shaun commented on Face fitting for Ammonia Masks and vision inserts for engineers who wear glasses.		
Shaun explained the advantages of conducting face fit tests and he has arranged for his engineers to undertake this test When complete Shaun will review the process and report back to AB.		
Shaun requested additional information on gantry and access inspection requirements. This was in reference to our customer sites, AB and the H&S advisors were not aware of any specific requirements however the responsibility remains with the owner or occupier of the site, however we have an obligation to report any issue real or suspected to the relevant functions on site.		
Daikin UK - Tracey Poulton		
Tracey made general comments throughout the meeting and thanked all attendees for the invitation.		

	Agenda Item Details	Actioned By	Date Actioned By
14	Any Other Business		
	Environmental System		
	AB used various presentation slides to inform all attendees on the recent developments in the environmental management system accreditation and performance		
	Environmental objectives were communicated and reviewed the system for measurement. AB commented on the Utilities Cost analysis and the DEMIS reporting system. AB confirmed that he has to report on a quarterly basis to Daikin and requests all relevant information to be forwarded when requested.		
	AB outlined the EMS folder and its contents and advised all that each location will be issued with procedures and will be audited in accordance with the company schedule.		
	Engineers Folder		
	AB confirmed that an engineers folder is currently in development and the Leeds and Midlands service centres are currently piloting the system. Upon review it is anticipated that it will become a company standard		
15	Company Objectives 2009		
	Discussed and agreed the following:-		
	All service Engineers to be registered with Skill Cards before the end of June 2009		
	2079- training to be conducted for 30% of service engineers		
	Manual Handling training to be conducted for all service engineers		
	Driver, information, instruction & Training to be conducted where identified.		
	Next meeting AB wishes to thank all attendees for their participation and will advise the H&S Committee of the next meeting September 2009, Date to be confirmed		
	Minutes Prepared by		
	A Bowden HSQE Manager		
	Please note these minutes must be displayed on company notice boards. All pages must be available to ensure effective communication
